👨‍💻 About Me

I'm a passionate and motivated programmer learning systems programming with C. I love building structured, modular projects and bringing features together in well-organized codebases. I'm actively developing real-world projects and exploring new challenges on GitHub.

💼 Projects

🔷 Social Media Clone in C

A modular command-line based social media simulation written in C.

Features:

- User registration & login

- Post creation & feed viewing

- Private messaging system

- Friend management

- Admin panel with user moderation

Tech Stack: C, File I/O, Modular Headers, Makefile

Repo: [Social Media Clone](https://github.com/dharanisindhu161/desktop-tutorial)

📚 Skills

- **Languages**:   C, Python (learning), Java (basics), HTML, CSS

- **Tools**: Git, GitHub, VS Code, GCC, Makefile

- **Concepts**: File handling, Modular C Programming, CLI development, OOP basics, Front-end development, UI/UX design

🚀 GitHub Contributions

- Created and maintained repositories with clean, modular code

- Explored Git branching, commits, and README documentation

- Organized project files and folders for clarity and scalability

📘 Education

Balla Dharani

Bachelor of Technology – Computer Science and Engineering

2024 – 2028

📈 Goals

- Build more real-world C, OOP, Python projects, and websites

- Learn Data Structures & Algorithms

\- Collaborate in open-source contributions

\- Create web-based apps using Python/JavaScript
